

# LTS AUTOMATED PHARMACY RX DISPENSING KIOSK

*A Complete, Modular Pharmacy Access Solution*

## WHAT IT IS

The LTS Rx Kiosk is a modular, expandable, automated pharmacy solution that extends prescription access beyond traditional pharmacy walls. It integrates with your existing pharmacy systems and workflows — putting you in control of your formulary, your patients, and your operations.

## THE PROBLEM IT SOLVES

- **Pharmacy deserts where** the nearest pharmacy has closed or is miles away
- **After-hours access gaps** that leave patients without their medications
- **Workflow burden on pharmacy staff** consumed by routine pickup tasks
- **Last-mile barriers** — transportation, mobility, and scheduling challenges that impact prescription adherence and health equity

## WHO IT'S FOR

Designed for pharmacies and healthcare organizations navigating a shrinking pharmacy workforce and a growing patient population.

- Our customizable Rx Kiosk allows you to add retail pharmacy services or expand your existing pharmacy reach without the need for brick and mortar — delivering 24/7 prescription access to the communities you serve.
- The LTS Rx Kiosk meets your patients where and when they need care most.

## KEY FEATURES

-  **Modular & Expandable Design** – Add inventory bays as your formulary grows. Three base configurations range from ~1,100 to ~3,500 packages.
-  **Climate Controlled** – Per-module temperature management maintains medication integrity to USP standards.
-  **Indoor & Outdoor Rated** – Hardened, tamper-resistant enclosure operates from –35°F to 158°F with UPS backup and integrated lighting.
-  **Your Formulary, Your Way** – Stock the medications your patients need most. The kiosk formulary is entirely yours to define, configure by location, and adjust based on the community needs.
-  **Remote Pharmacist Counseling** – Live video and audio at the kiosk or on the patient's mobile device for patient counseling and pharmacy compliance.
-  **24/7/365 Operation** – Unattended with centralized remote monitoring, multi-factor patient verification, and 99%+ uptime.
-  **Built for Security & Compliance** – Tamper-resistant vault with alarms, role-based access, immutable audit logs, and HIPAA-aligned controls across your kiosk network.
-  **ADA-Compliant** - Wheelchair approach, reach ranges, audio guidance, and high-contrast display.

## POSSIBLE USE CASES

### Independent Pharmacies

Extend your hours and reach without hiring additional staff. Place a kiosk outside your storefront or at a nearby community location to offer 24/7 prescription pickup — even when the pharmacy is closed.

### Multi-Location Pharmacy Group

Scale prescription access across markets without building new pharmacy locations. Deploy kiosks at each site with centralized management, consistent branding, and location-specific formularies.

### Urban & Rural Hospitals

Close after-hours access gaps for patients discharged in the evening or on weekends. A kiosk in the lobby or near the exit ensures patients leave with their medications in hand — reducing readmissions and improving outcomes.

### Health Systems

Extend pharmacy services across your entire network without duplicating pharmacy infrastructure at every facility. Deploy kiosks at outpatient clinics, satellite offices, and community locations with enterprise-wide visibility and control.

### Specialty Care Centers

Streamline medication pickup for patients receiving ongoing treatment. Patients complete their appointment and pick up their prescription on the way out, all in one visit — no second stop at a pharmacy required.

### Rural Health Clinics

Bridge geographic barriers for patients who travel long distances to fill prescriptions. A kiosk at or near the clinic gives patients same-day medication access without a separate trip to a distant pharmacy.
